Design and Development

Project: Design and develop a page for the the LIR website which would highlight a special fund raising campagin. Main feature would be an image that would start with empty shelves and then "fill" as more money was raised.

Solution: Using WordPress custom fields, the end-user is able to simple type in the current funds raised. The page template includes the php to process the input, and relay that to the CSS. The empty shelves is the background image, while the image with full shelves fill using the CSS clip property.

Development URL: chiseledimages.com/alpha/ag_lir/10for10

```php
$don = get_field('amount_donated');
if ($don != "") {
    $amt = $don/10000;
    $per = $amt*100;
    $width = $per*4.28;
}
else {
    $width = 20;
}
?>

        <div class="foodwrapper">
            <img src="<?php echo get_stylesheet_directory_uri()?>/images/shelves-full.png"
class="shelf" style="clip: rect(0px, <?php echo $width ?>px, 519px, 0px); position: absolute; top: 0px;
left: 0px; margin: 0px;">
            <div id="total-donation">
                <h3 class="nycd-font">&#36;<?php echo $don ?></h3>
            </div>
        </div><!--foodwrapper-->

        <div id="total-percent">
            <p class="nycd-font"> We've reached <?php echo $per; ?>&#37; of our goal&#33;&#33;</p>
        </div>
```

```css
.foodwrapper {
    background: url("images/shelves-emtpy.png") no-repeat scroll 0 0 rgba(0, 0, 0, 0);
    height: 519px;
    left: 106px;
    position: absolute;
    top: 120px;
    width: 428px;
}
```
